
RESEARCH PROJECT CS-597-193

Week 1

01/23/2023 - 01/29/2023

Eneko Gonzalez

As the first week in the research project the main purpose has been to learn about the field of knowledge through the work that has already been done around it. Also, I have met the work team and have become familiar with the work methodology.

PROGRESS

- Creation of the GitHub repository for the project:
<https://github.com/enekogonzalez30/PoseEstimationDeepFake-CS-597-193>
- Reading and summary of the paper: Realtime Multi-Person 2D Pose Estimation using Part Affinity Fields
Link: https://github.com/enekogonzalez30/PoseEstimationDeepFake-CS-597-193/blob/main/papers/Notes_RT_Multi-Person%20_2D_PE_W_PAF.pdf
- Reading and summary of the paper: 3D human pose estimation in video with temporal convolutions and semi-supervised training
Link: https://github.com/enekogonzalez30/PoseEstimationDeepFake-CS-597-193/blob/main/papers/Notes_3D_human_PE_in_video_W_TCN_%26_SS_train.pdf

MEETINGS

Two control meetings have been held:

- 1-on-1 meeting: Monday 01/23 (15:00-16:00)
- Research Group meeting: Thursday 01/26 (13:00-15:00)

NEXT STEPS

- Reading and summary of the paper: <https://ieeexplore.ieee.org/document/9897790>
- Read more about Biometrics and biomechanics.
- Read more about DeepFake.
- Think about possible project approaches.
